Re: Charlotte Motor Speedway
Landfill V - Cell 1A&1B Closure

Dear Mr. Coffey,

BFI is currently closing the above referenced landfill cells in accordance with the approved closure plan and NCDEHNR regulations. The 180 day closure period expired on or about January 31, 1997. We requested additional time for closure in a letter dated January 7, 1997. In that letter, I stated that we would be done by March 31, 1997. However, due to continuing weather problems we are requesting another extension until April 30, 1997.

The synthetic liner is now 100% complete and the contractor is placing the remaining composite and geotextile. Plastic Fusion Fabricators, the synthetics contractor, expects to complete the synthetics portion of the closure by Saturday, April 5, 1997. Earnhardt Grading, the earthwork contractor, will begin placing the remaining cover material on Monday, April 7 and anticipates being complete by the end of the month.

We will notify the Solid Waste Section when the closure is 100% complete, and will submit the CQA documentation at that point. If you have any questions or would like more information, please contact me at (704) 782-2004. We appreciate the cooperation the Solid Waste Section has shown to date and look forward to more of the same in 1997.

Sincerely,

John D. Barnard, P.E.
Market Area Engineer
